WEPLACE

Malaysia's Hyperlocal Social & Marketplace Infrastructure

Connecting Communities, Improving Everyday Life

Weplace is a hyperlocal social marketplace inspired by Kita Jaga Kita — where neighbours can buy, sell, support, and connect with local community.

PROJECT DESCRIPTION

Problem: Micro-sellers are growing fast in Malaysia — some are among our neighbours, but **we hardly know about them..** Meanwhile, **living costs is rising**, more local options could offer **more affordable choices**.

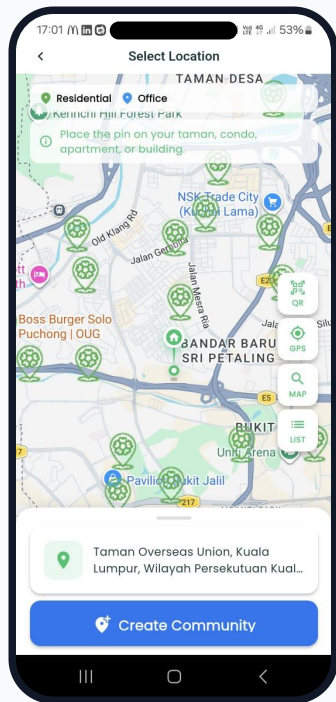

Local, micro, and home-based sellers can offer more affordable choices — if we can access them easily.

Weplace uses proximity to bridge the gap with in-app ordering — making it easier for buyers to discover and order, and for sellers to deliver and fulfil locally.

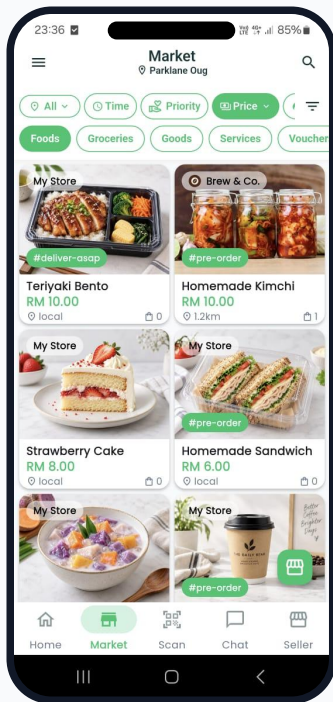

More income opportunities for micro-sellers; More affordable, convenient choices for buyers

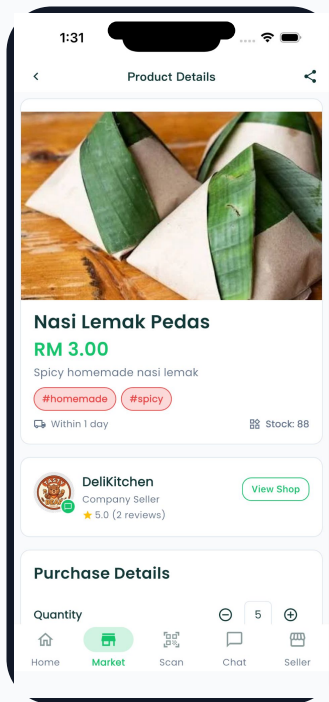

BUYER DISCOVERY & ORDER

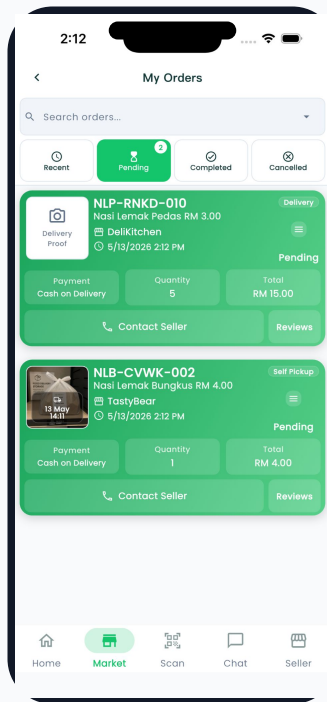

Join Community
Join by residential
taman/condo/apartment

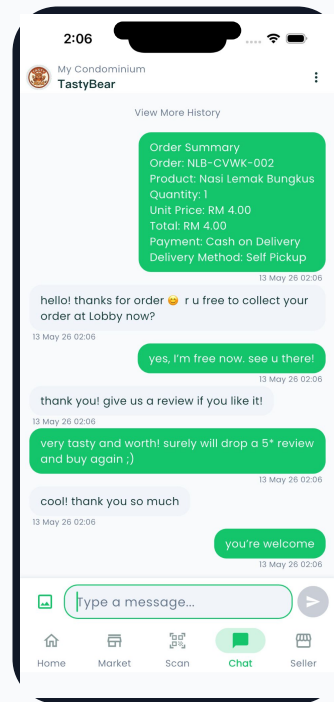

Market Listings
Browse local food, goods, and
services

Product Orders
Browse Item and order

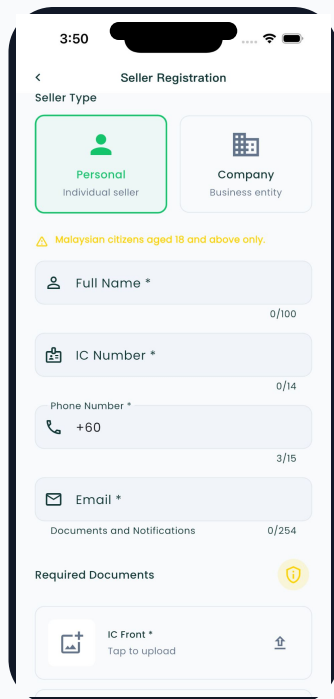

Order Management
Track orders and transaction
history

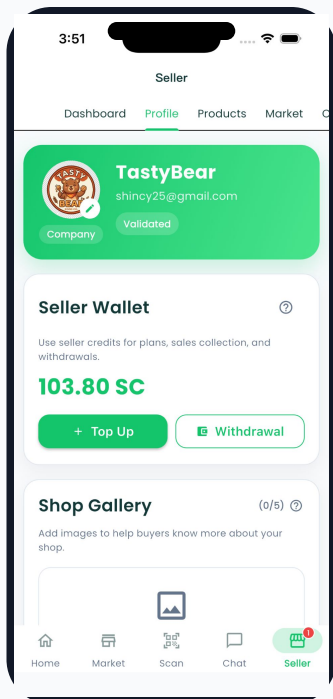

Instant Chat
Direct communication with local
sellers

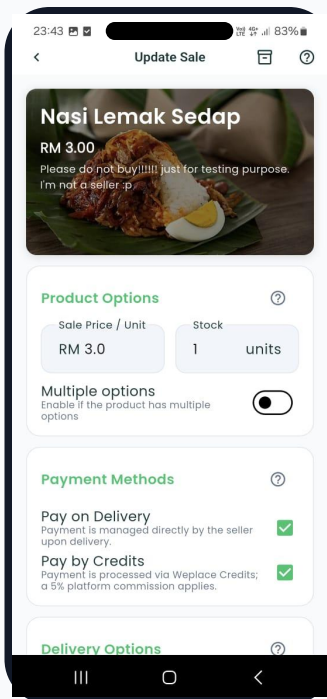

SELLER HUB & ORDER FULFILLMENT

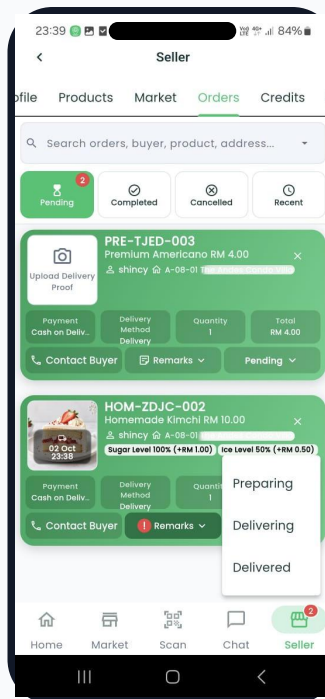

Seller Registration
Required Malaysia IC or SSM
for trusted and secured trade

convincing power

Product Creation
Easily list new items with details
and options

Order Fulfillment
Upload delivery proof to one
click update to completed

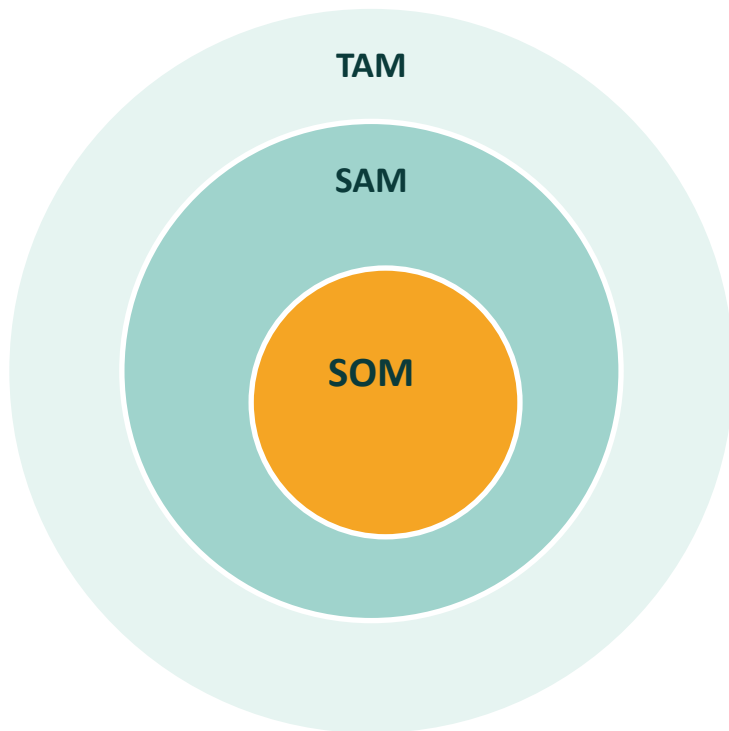

Flexible Listing
Payment Method, Delivery
Method/Time/Distance, Opening
Hours

TECHNOLOGY BENCHMARKING

Dimension	Weplace	TikTok / REDnote / Instagram	WhatsApp / Facebook	Shopee / Grab
Discovery	Distance-based	Content / algorithm-based	Feed / group-based	Search / algorithm-based
Visibility	Persistent local listings	Depends on content performance	Decays in feed/chat	Persistent nationwide listings
Seller effort	Low content dependency	High content creation effort	Manual posting	Listing + platform operations
Reach	Same and nearby communities	Broad / potentially nationwide	Network/group reach	Nationwide
Fulfilment	Nearby delivery/pickup	Usually off-platform	Self-arranged	Courier / rider ecosystem
Core strength	Local relevance Daily needs	Attention & awareness	Communication	Scale & transaction infrastructure

Weplace does not compete on nationwide reach — it focuses on nearby demand, shorter fulfilment distance, and local distribution efficiency.

TARGET MARKET

Total Addressable Market:

~1.3M MSMEs / 9.1M households

Malaysia-wide potential seller & household user base

Serviceable Available Market:

~5–6M urban households + urban micro-sellers

Klang Valley, Penang, Johor Bahru & other dense residential markets

Serviceable Obtainable Market:

30 active communities, 60 active sellers

30 active communities | 60 active sellers | 2000 users in 18 months

Active seller = at least 1 order in the last 30 days.

Active community = at least 30 users in 1 community
